**Ongoing protection
against **malware**
and bad **apps**.**

All apps are analyzed before they're available for download. And daily scans help disable Any malware and harmful apps found on your device.

Use Google Play Protect to help keep your apps safe & your data private

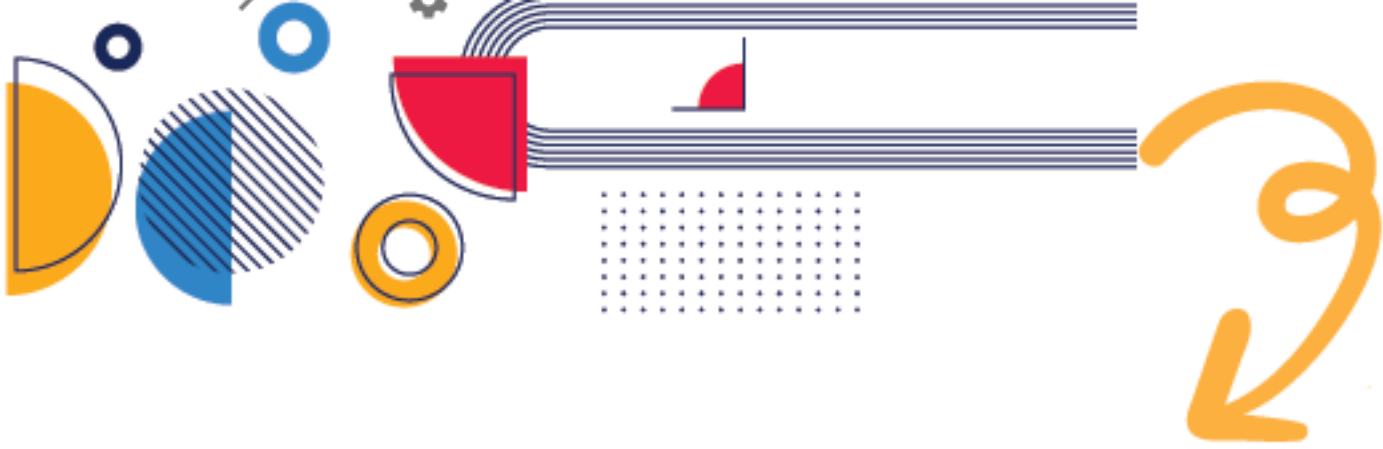

Google Play Protect checks your apps and devices for harmful behavior:

- It runs a safety check on apps from the Google Play Store before you download them.
- It checks your device for potentially harmful apps from other sources. These harmful apps are sometimes called malware.
- It warns you about potentially harmful apps.
- It may deactivate or remove harmful apps from your device.
- It warns you about detected apps that violate our [Unwanted Software Policy](#) by hiding or misrepresenting important information.
- It sends you privacy alerts about apps that can get user permissions to access your personal information, violating our [Developer Policy](#).
- It may reset app permissions to protect your privacy on certain Android versions.
- It may prevent an application from being installed that is unverified and uses sensitive device permissions that are commonly targeted by scammers to commit financial fraud.

Verify your device certification status

1. Open the Google Play Store app .
2. At the top right, tap the **profile icon**.
3. Tap **Settings**.
4. To check if your device is Play Protect certified, tap **About**

How to turn Google Play Protect on or off

Important: Google Play Protect is on by default, but you can turn it off. For security, we recommend that you always keep Google Play Protect on.

1. Open the Google Play Store app .
2. At the top right, tap the profile icon.
3. Tap **Play Protect** Settings .
4. Turn **Scan apps with Play Protect** on or off.

**Get security
that's constantly
